Technical Skills

- Programming: Java, C/C++
- Tools/Environment: IntelliJ, GitHub, SQL*
- Test: JUnit
- Web: HTML5, CSS, JavaScript

* currently learning

Technical Projects

Mangosteen Budget (Java, JavaFX)

Sep 2019 – Dec 2019

- Developed budgeting application with graphical interface which allows creation, modification, and deletion of income and expense items with local data saving.
- Implemented visualization of income and expenses by time period and category.

WorldWarK (Java, Java Swing)

May 2018

- Developed 2D space shooter game in a three-person development team.
- Implemented player mechanics including player movement, bullet firing, and collision detection.
- Implemented graphical interface including GUI, background scrolling, and graphics display.

J3 Groceries (HTML5, CSS, JavaScript)

May 2017

- Developed an online shopping website in a three-person development team.
- Implemented JavaScript processing including dynamic inventory population, search, browse, shopping cart cookies, and dynamic manipulation of HTML and CSS.
- Designed visual appearance of website using HTML and CSS styling.

Work Experience

Teaching Assistant

Sep 2019 – Aug 2020

The University of British Columbia

- Teaching Assistant for a first-year introductory course in algorithms, discrete math, and circuits.
- Taught laboratory classes about physical circuits, simulated circuits, and regular expressions.
- Graded student homework, assignments, and exams.
- Helped clarify concepts to students and answered questions through an online forum.

Class Ambassador

Sep 2019 – Dec 2019

WIZE Education Inc.

- Assisted in designing an online multivariable calculus course targeted towards UBC students.
- Coordinated with tutor to emphasize topics and organize course content.

Education

The University of British Columbia

Sep 2018 – Present

Bachelor of Science

- Major in Computer Science
